PLEASE BRING THIS PROGRAMME WITH YOU

INVITATION

This Victory Year your Academy Executive presents the Winter Clinic on November 28th.

In the following pages, you will find the programme for a complete day of dental education combined with periods for your relaxation.

The Winter Clinic has come to be looked upon as one of our outstanding achievements. This year the committee under the Chairmanship of Dr. Bliss has endeavoured to provide an outstanding programme.

It will be a pleasure to welcome our Toronto men and also as many from other areas as can possibly attend. I therefore take this opportunity of extending an invitation to every dentist receiving this programme to be with us. You will note the Dental Nurses and Assistants are holding a meeting in conjunction with ours. May I suggest that you arrange to have your Dental Nurse or Assistant also attend these sessions.

HAROLD A. SWALES

President.

ACADEMY OF DENTISTRY

Toronto

ANNUAL WINTER CLINIC

CONDENSED PROGRAMME

8.30 a.m. Registration.

9.30 a.m. MORNING SESSION
Limited Attendance
and Group Clinics

12.30 p.m. Luncheon
Guest Speaker—
Dr. David A. MacLennan
Subject: "Beginner's Luck"

2.30 p.m. AFTERNOON SESSION
Limited Attendance
and Group Clinics

5.00 p.m. Kodachrome Motion Picture
"This is Mexico"
Dr. S. Copeland

6.00 p.m. Dinner and Entertainment

8.00 p.m. Table Clinics.

GENERAL INFORMATION

1. Dentists of Toronto and the Toronto area who have not affiliated with the Academy of Dentistry and wish to attend the Winter Clinic should register at the Registration Desk. The annual dues are \$10.00—this includes all the privileges of the Academy.
2. Dentists outside the Toronto area, wishing to become Associate Members of the Academy to attend the winter clinic, are requested to register at the Registration Desk. See page 7.
3. Toronto Fellows of the Academy please register at Registration Desk under your district groups to avoid confusion and delay.
4. Members of the Ontario Dental Nurses and Assistants Association and of the Dental Nurses Alumnae Association who are employed by Fellows of the Academy of Dentistry, also nurses and assistants of the registrants from out-of-town, are invited to attend all sessions, except the Limited attendance clinics. This year, however, the nurses have their own special Winter Clinic Programme held in Parlor "D" in the afternoon commencing at 3.00 p.m. All nurses attending are requested to register at no fee at a special registration desk.
5. Badges must be worn for admittance to all clinics.
6. Luncheon tickets (\$1.50) to hear Dr. David MacLennan's address, and dinner tickets (\$2.00), where there will be entertainment, should be obtained when registering.
7.
 - (a) Registration will be under the direction of Dr. Edgar A. White.
 - (b) Group Clinics will be under the supervision of Dr. R. J. Godfrey. There are 14 Group Clinics. In addition there are three Limited Attendance Clinics for which there is a fee of \$2.00 each.
 - (c) Evening Table Clinics will be under the direction of Dr. George C. Hare.

8. To avoid disappointment, be sure to mail the application form (See page 9) with your cheque for Limited Attendance Clinics (\$2.00 each) AT ONCE to Dr. Edgar A. White, 1474 Bathurst Street, Toronto, 10. These clinics are open only to Fellows and Associate Members of the Academy. All cheques should be made payable at par to the Academy of Dentistry.
-

ASSOCIATE MEMBERSHIP

This special membership of \$3.00 is extended to Dentists in practice outside the Toronto area. The Associate Member may attend the Winter Clinic and share the educational material and good fellowship which this day presents.

The three dollar fee, of course, does not include the limited attendance clinics (which are \$2.00 each), or the luncheon and dinner. Tickets for the luncheon and dinner may be purchased at Registration Desk.

PLEASE BRING THIS PROGRAMME WITH YOU

LUNCHEON MEETING

12.30 p.m.

Guest Speaker: Dr. David A. MacLennan

Subject: "Beginner's Luck"

PLACE: Concert Hall

Tickets \$1.50

DINNER MEETING

6.00 p.m.

DINNER AND ENTERTAINMENT

Good food and lively entertainment will refresh you for the evening of Table Clinics.

PLACE: Concert Hall

Tickets \$2.00

IMPORTANT: Please secure your tickets for luncheon and dinner when you register.

Address

Dentists sending mail applications on or after November 21st
will please call at Registration Desk marked ADVANCE
REGISTRATION.

EXHIBITION OF PHOTOGRAPHIC PRINTS

This is an interesting feature in the Table Clinic section. The Photographic Prints are the work of our colleagues.

The success of this Exhibition, however, depends upon the generous co-operation of those dentists who are the creators of Photographic Prints. Will dentists, who are interested in this hobby, kindly telephone the undersigned? Out-of-town dentists are also invited to share their prints with us. Will you kindly write to:

Dr. Charles McLean,
Suite 1503,
372 Bay Street,
Toronto 1, Ontario.

LIMITED ATTENDANCE CLINIC

Subject: CROWN AND BRIDGE PROSTHESIS.

Clinician: DR. O. S. CLAPPISON, Toronto, Ontario.

Clinic: The introduction to this clinic will be a plea for better Crown and Bridge construction. The common errors of Crown and Bridge Prosthesis will be emphasized. The importance of relating fixed bridge construction to the whole dentition and the needs of the patient, will be stressed. The types of preparation for abutments, the advantages and disadvantages of impression materials, selection of pontics, their construction and the relating of units, also the possibilities and limitations of acrylic resins in Crown and Bridge work will be covered.

Place: Room 10

Time: 9.30—11.45 a.m.

Chairman: DR. T. N. SCOTT

LIMITED ATTENDANCE CLINIC

Subject: COMPLETE DENTURE PROSTHESIS.

Clinician: DR. IRVIN H. ANTE, Toronto, Ontario.

Clinic: This course on Complete Denture Procedure is designed to be of great value to the general practitioner. It is devoid of frills, full of condensed information and helpful suggestions, that point the way to sound conclusions. It should help solve complete denture problems.

Place: Room 10

Time: 2.30—4.45 p.m.

Chairman: DR. GEORGE COVEY

LIMITED ATTENDANCE CLINIC

Subject: PARTIAL DENTURES AND
FUNCTIONAL PARTIAL DENTURE
IMPRESSIONS.

Clinician: DR. J. FRANK GIFFEN, London, Ontario.

Clinic: Dr. Giffen will preface his clinic with a short talk on Partial Denture Prosthesis. He will then demonstrate, with a patient, his technique of taking a Functional Partial Lower Impression. In addition he will show models demonstrating the step by step procedure from the taking of the impression to the completion and insertion of the appliance.

Place: Room 7

Time: 9.30—11.45 a.m.
2.30—4.45 p.m.

Chairmen: DR. HOWARD GRAHAM
DR. FRANK L. COLE

GROUP CLINIC

Subject: IMMEDIATE COMPLETE DENTURE
TECHNIQUE.

Clinician: DR. FRANK MARTIN, Toronto Ontario.

Clinic: This clinic will present a classification for immediate dentures:

- (1) Provisional or temporary denture.
- (2) Immediate denture with labial gum reproducing aesthetics.
- (3) Modified immediate denture, adaptable to cases where a more or less radical change is going to be made for aesthetic purpose. This presentation will cover impression technique, taking the bite, setting up of teeth, surgery, and insertion of denture.

It will be illustrated by kodachrome slides and motion pictures.

Place: Room 8

Time: 10.45—11.45 a.m.
3.45—4.45 p.m.

Chairmen: DR. H. WALTON-BALL
DR. J. A. HILLIER

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: COMPLETE DENTURE TECHNIQUE
IN THREE APPOINTMENTS.

Clinician: DR. J. F. COONEY, Woodstock, Ontario.

Clinic: The clinician will demonstrate a method of making Complete Upper and Lower Dentures in three appointments; dentures which will be satisfactory from the standpoint of aesthetics, occlusion, stability, retention and comfort. The technique combines features of those as described by Dr. H. F. McGrane, Dr. John M. Besser and Dr. Ralph L. Christy.

The individual steps will be presented from the time the patient enters the office to the time the case is completed. The method reduces actual chair time and the number of appointments.

The clinic will consist of a complete demonstration of the technique, using models and charts, followed by a session in which questions pertaining to the various phases will be answered.

Although this method has been in use only a short time the results are most gratifying.

Place: Room 2

Time: 2.30— 3.30 p.m.

Chairman: DR. C. C. COLLINS

GROUP CLINIC

Subject: OPERATIVE PROCEDURES FOR PORCELAIN
JACKET CROWNS

Clinician: DR. J. M. SHELDON, Toronto, Ontario.

Clinic: The preparation of a tooth for a porcelain jacket crown has always been considered a very difficult and tedious operation.

A technique will be shown which simplifies the whole procedure and gives definite steps which will considerably reduce operating time.

Variations of the accepted technique, failures, indications and contra-indications will be discussed.

Place: Room 1

Time: 10.45—11.45 a.m.

Chairman: DR. VICTOR H. LARGE

N.B.—This clinic will be given in conjunction with that given by Dr. Pepper. See page 17.

GROUP CLINIC

Subject: SHAPING AND STAINING ANTERIOR
PORCELAIN TEETH FOR IMMEDIATE
DENTURES

Clinician: DR. J. B. PEPPER, Toronto, Ontario.

Clinic: This clinic deals with the aesthetics of complete and partial denture restorations. It covers tooth colour (physics of colour), harmony (size, shape, peculiarities of forms of teeth), and position of teeth in relation to lips, shape of face and profile.

From the patients' point of view, aesthetics is the only phase of their dental restoration which they wholly appreciate.

Place: Room 1

Time: 10.45—11.45 a.m.

Chairman: DR. VICTOR H. LARGE

N.B.—This clinic will be given in conjunction with that given by Dr. Sheldon. See page 16.

GROUP CLINIC

Subject: SIMPLE GOLD FOIL RESTORATIONS.

Clinician: DR. M. J. QUIGLEY, Toronto, Ontario.

Clinic: More gold foil restorations would be inserted if the patient were as aware of the advantages as the dentist.

Insertion of gold foil can be almost as easy as insertion of amalgam if:

- (1) Cavities chosen are small.
- (2) Cavity is made easy of access.
- (3) Preparation is well done.
- (4) Both patient and operator are prepared.

Place: Room 6

Time: 9.30—10.30 a.m.

Chairman: DR. RUSSELL BENNETT

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: AMALGAM RESTORATIONS.

Clinician: DR. G. W. JOHNSTON, Toronto, Ontario.

This clinic will present the various steps to make a good amalgam restoration.

It will deal with cavity preparation, linings and bases, mixing and pressure, packing, proper wedging, and separation for proximal restorations.

The various steps in carving, finishing, and polishing will be discussed. A patient will be present showing finished restoration in the mouth.

Place: Room 1

Time: 9.30—10.30 a.m.
3.45— 4.45 p.m.

Chairmen: DR. R. R. BUTLER
DR. LLOYD DAVIS

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: PRINCIPLES OF ROOT SURGERY.

Clinician: DR. L. J. FENECH, Windsor, Ontario.

- Clinic:*
- (1) Management of single rooted pulp involved teeth.
 - (2) Modern precision method of pulp involved multi-rooted teeth (molars and bicuspid) by the silver point technique.
 - (3) Management of pathological pulp of anterior teeth by immediate sterilization technique.
 - (4) Armamentarium.
 - (5) Application of bacteriologic technique as a practice builder.

Place: Room 2

Time: 10.45—11.45 a.m.

Chairman: DR. J. GORDON CHALMERS

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: INTERCEPTING MALOCCLUSION

Clinician: DR. G. VERNON FISK.

Clinic: The increasing interest by members of the dental profession in all phases of preventive dentistry is one of the heartening signs of the times. Certainly, the interception of malocclusion offers the only means whereby the great masses of humanity may receive the benefits of orthodontic service, and unless the general practitioner recognizes and institutes prophylactic measures in the mouths of young patients, the problem of malocclusion, uncared for, will continue in its present unsatisfactory state.

In this clinic will be presented, within the limitation of time, some of the important etiological factors of malocclusion together with simple but effective interceptive measures.

Place: Room 1

Time: 2.30— 3.30 p.m.

Chairman: DR. C. SUMMERFELDT

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: STATUS OF PERIODONTIA
IN MODERN DENTISTRY.

Clinician: DR. MURRAY ROBB, Toronto, Ontario.

Clinic: This clinic opens with the statement that modern treatment methods can cure periodontal disease. This is, of course, qualified by many factors which will be discussed. Slides will be shown of treated cases.

If the disease is curable, then its detection is imperative. What the dentist should look for, and methods of securing and recording the information, will be described and illustrated.

The importance of periodontia in a complete dental health service will be pointed out.

Finally, the matter of prevention will be discussed and some operative procedures described that should be of interest to every general practitioner.

Place: Room 8

Time: 9.30—10.30 a.m.
2.30— 3.30 p.m.

Chairmen: DR. J. C. FULLERTON
DR. C. W. SMYTHE

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: RADIODONTIC TECHNIQUE.

Clinician: DR. R. E. DIPROSE, Toronto, Ontario.

Clinic: A patient will be used to demonstrate the making of dental radiographs. The technique used will be the method developed by Dr. C. O. Simpson, who has specialized in radiodontia since 1917. The superiority of his method is the result of years of intensive study.

In making x-ray surveys of the mouth the vertico-horizontal angle used in each exposure has been recorded. The angles now recommended are the average of thousands of cases and while minor changes are necessary with certain patients, the average angle gives the operator a position from which to proceed.

Place: Room 6

Time: 10.45—11.45 a.m.

Chairman: DR. A. R. SCOTT

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: ORAL SURGERY FOR THE GENERAL PRACTITIONER.

"Let's be Practical".

Clinician: DR. GEORGE A. MORGAN, Toronto, Ontario.

Clinic: This clinic will be devoted entirely to the management of every day problems in Dental Surgery, Extraction, Precautions, Operative Procedure, and Post-Operative treatment.

Bring Your Problems

Place: Room 2

Time: 9.30—10.30 a.m.

Chairman: DR. A. R. KERR

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: NUTRITION AND IT RELATION
TO DENTAL CARIES.

Clinician: DR. M. A. COX, Toronto, Ontario.

Clinic: Nutrition, whether good nutrition or bad nutrition, depends on a number of factors:

1. The geographical location of the individual.
2. The factors of heredity.
3. The diet of the parents, particularly of the mother during pregnancy.
4. The diet and care during infancy and childhood.
5. The diet and care during adult life.
6. Freedom from disease at all ages, or at any rate adequate care during illness, as a measure of preventing sequelae, particularly complications that tend to remain with the individual and so prevent normal health, growth, and development.

All, or any one of these various factors, may play a part in the prevention, or in the production of dental caries. Abnormal diets can produce dental caries and we believe certain diets—those very low in carbohydrate used for limited periods—can arrest caries and possibly prevent caries in the future.

Place: Room 6

Time: 3.45— 4.45 p.m.

Chairman: DR. CLARENCE E. BROOKS

PLEASE BRING THIS PROGRAMME WITH YOU

GROUP CLINIC

Subject: PHARMACOLOGY OF SOME DRUGS
USEFUL IN DENTISTRY.

Clinician: DR. G. H. W. LUCAS, Toronto, Ontario.

Clinic: Since the discovery of epinephrine in 1895, intense interest has been shown in the chemistry and pharmacology of this hormone.

A large number of sympathomimetic drugs have been synthesized, some of which have found place in the armamentarium of the physician and dentist.

A discussion of the pharmacology and use of some of these should be of interest to dentists who employ several of them as vasoconstrictors in local anaesthetic solutions.

Place: Room 6

Time: 2.30— 3.30 p.m.

Chairman: DR. ROBERT J. MARSHALL

GROUP CLINIC

Subject: THE PSYCHOLOGICAL ASPECT
OF DENTISTRY.

Clinician: DR. W. B. T. AMY, Toronto, Ontario.

Clinic: The dictionary states that "Psychology is the study of the Human Mind". It is, however, much more than that.

Efficiency and skill do not necessarily spell Professional Success. It has been said, "Actually a dentist never works on teeth but on a human being. Often he becomes so fascinated by technical problems that he cannot see the patient for his teeth".

The psychological effect of environment, of adult approach, of child approach, of operations (surgical and cavity preparation), of estimates and collection of accounts, of social contacts, of enthusiasm, of self-confidence or knowing that you know, of cleanliness, good habits, general knowledge, patience and humor will be discussed.

Place: Room 2

Time: 3.45— 4.45 p.m.

Chairman: DR. R. E. MARTIN

GROUP CLINIC

Subject: SCIENTIFIC LIGHTING FOR DENTAL OFFICES.

Clinician: Mr. E. H. Greppin, Manager, Light Department,
Wilmot Castle Co., Rochester, N. Y.

Clinic: What allows a dentist to see, why he has a unique visual problem, how good lighting can affect the character of his work, and why it influences his mental and physical health, are all factors involved in proper illumination. A discussion of these factors is the primary purpose of this paper.

A short review of the physics of light and color, and the physiological and psychological factors of vision will be presented, together with an analysis of the mechanics of the lighting equipment.

The paper will be well illustrated with slides, and at the table clinic in the evening a demonstration of some of the points of the lecture will be attempted.

Place: Parlor "B", Convention Floor

Time: 2.30— 4.45 p.m.

Chairman: DR. R. E. JOHNSTON

MOTION PICTURE

Subject: THIS IS MEXICO

DR. S. COPELAND.

Dr. Copeland will present his Kodachrome motion picture, "This is Mexico". This land is a paradise for color photographers, a wonderland of surprises. Dr. Copeland brings to us this rich treat on Mexico with all its gorgeous scenes of mountain, desert, city and palaces. Don't miss this Travelogue in color, planned for your relaxation.

Place: Parlor "A", Convention Floor

Time: 5.00— 6.00 p.m.

Chairman: DR. GORDON S. PAUL

TABLE CLINICS

DENTAL PUBLIC HEALTH

Table

1. Dental Public Health Literature.

DR. J. C. FULLERTON, Toronto.

2. Canadian Dental Hygiene Council Literature.

DR. HUGH R. McLAREN, Toronto.

OPERATIVE DENTISTRY

3. A simple method of establishing normal interproximal contact for compound inlays employing wax.

DR. J. BRUCE GREER, Toronto.

4. Simplified Silicates—Technique for inserting two or more fillings from one mix, using wax retained matrix; also how to blend shades.

DR. C. T. MASON, Hamilton.

5. Root Canal Therapy and Root Resection.

DR. L. J. FENECH, Windsor.

6. The efficiency of a dental assistant conducting preparatory stages for the necessary armamentarium with the time factor conserved re root canal therapy and root resection.

MISS BESSIE MOLE, Windsor.

7. Where can acrylic resin replace porcelain to advantage?

DR. H. MERCER, Toronto.

8. Cavity Preparation and Amalgam Restorations.

DR. J. R. KREUTZER, Toronto.

PROSTHODONTIA

9. Complete Denture Technique in three appointments.

DR. J. F. COONEY, Woodstock.

TABLE CLINICS (Cont'd)

Table

10. Occlusal Rests and Indirect Retainers for Partial Dentures.

DR. OWEN J. YULE, Toronto.

ORAL SURGERY

11. Sutures and Suturing. Types and sizes of needles, and a discussion of the suture material best adapted for use in Dentistry, threading of needles, sterilization, methods of suturing, types of knots and the methods of tying them.

DR. J. H. JOHNSON, Toronto.

12. The Treatment of maxillo-facial injuries. Methods of reduction and fixation of fractures as employed in a Maxillo-Facial Centre in the Mediterranean Theatre of War.

DR. DOUGLAS TANNER, Toronto.

13. Planned tooth division to avoid accidental fracturing of roots. The use of elevators.

DR. GORDON FRAWLEY, Toronto.

14. Surgical removal of roots. A technique for the general practitioner.

DR. L. L. CROWLEY, Windsor.

ANAESTHESIA

15. Local Anaesthesia. Technique of injections.

DR. CARL T. MOYLE, Hamilton.

RADIOGRAPHY

16. The individual processing of dental films.

DR. R. E. DIPROSE, Toronto.

17. Reduction of Dental Radiographs.

CAPT. M. N. ROCKMAN,
Canadian Dental Corps.

TABLE CLINICS (Cont'd)

PERIODONTIA

Table

18. The application and uses of the Canadian Dental Corps' Periodontal Pack.

MAJOR W. G. McINTOSH,
Canadian Dental Corps.

CAPTAIN H. J. WILDFONG,
Canadian Dental Corps.

ORTHODONTICS

19. Some uses of acrylic resin in Orthodontics.

DR. HOLLY HALDERSON, Toronto.

20. Case Report. The implantation of bone for closure of cleft of the palate.

DR. G. V. FISK, Toronto.

CHILDREN'S DENTISTRY

21. A simple method of filling deciduous molars with pulp exposures; to be completed in one visit.

DR. HAROLD G. LEAROYD, Sutton West.

22. The occlusion of permanent dentition where removal of all deciduous teeth has occurred before five years of age.

DR. J. A. MARSHALL, Belleville.

LIGHTING

23. Scientific Lighting for Dental Offices.

MR. E. H. GREPPIN, Rochester, N.Y.

REHABILITATION

24. The rehabilitation section of the War Services Committee of the Academy of Dentistry will have an information table at the Winter Clinic. The chairman will be in attendance throughout the evening to answer enquiries and to offer any assistance possible.

DR. HOWARD GRAHAM, Toronto.

TABLE CLINICS (Cont'd)

PHOTOGRAPHY

Table

25. A display of Photographic Prints will be on exhibition in the Table Clinic Hall.

You will enjoy this collection of Photographic Prints displaying the artistry of your colleagues.

HOBBIES

26. A discussion of shot guns and ballistics.

DR. G. D. BEIERL, Toronto.

27. The art of dry and wet fly-tying.

DUNCAN JENKINS, 5th year Student.

CLINICS BY DENTAL NURSES AND ASSISTANTS

28. A Sterilization Technique for the Dental Office.

ANN POLLOCK, KAY MACEWAN

29. Inlays: Direct and Indirect.

RUTH STAPLES, RUTH MAYHEW

30. "Quickies" on the care of Dental Instruments.

MARJORY FORMAN, BETTY HUESTON

31. Everything at your finger tips.

MARION BARTON, ANN CONROY

32. Burs !!! MARGARET MOFFAT

33. Suitable Time Savers EVELYN JORDAN

34. Office Records ELIZABETH BROWN

35. Positive Sterilization and Lubrication of the
Contra-Angle Handpiece DORIS BRACEWELL

8.00 p.m. Table Clinics

From the complimentary luncheon at 12.30 p.m. until late in the evening, an interesting and informative programme has been planned for the nurses and assistants at the Winter Clinic. We would urge that every girl employed in a dental office attends and takes advantage of the opportunity to learn new methods and techniques, short-cuts and aids in having these hectic days run smoothly.

Outstanding men have consented to address these sessions, and we will be looking for YOUR NURSE OR ASSISTANT.

Register not later than November 21st.
